

THE FAMILY TIE BIOS

Matthew Glasson, director/writer/producer:

Born and raised in the Chicago, IL suburb of Mt. Prospect, Matthew Glasson was only two when he began to have fantasies about fellating his dead uncle. Fortunately, these remained fantasies and inspired him to allocate these energies into his art as a photographer, writer and filmmaker. THE FAMILY TIE is his second video featurette, his first being THE PUBIC MUFFIN--an homage to the surreal work of Salvador Dali and Luis Bunel. He currently lives in Greenpoint, Brooklyn.

Scott Greene, actor/writer/producer:

Scott Greene was fortunate to meet Mr. Glasson at a young age, who terrorized him with tales of a beloved movie character being viciously slaughtered. In late adolescence, Greene ingratiated himself with Glasson and his family by providing a top-of-the-line VHS camcorder, which he encouraged Glasson to use whenever the desire arose. The two made many short videos together, from comedies to documentaries, with Glasson often calling the shots and Greene usually acquiescing to his every demand. Greene's "friendship" is the lynchpin in his plan to piggyback on Glasson's success, thereby ensuring his own international fame and fortune. His favorite movie is BACK TO THE FUTURE.

Phil Anzelmo, actor:

Without any acting experience, Matthew Glasson chose Phil Anzelmo to take on the lead role of the misfortunate hero, and indeed it was quite a journey for him to learn the ropes by completely immersing himself in the role. But Anzelmo wanted something "to show my grandkids" when and if he were to have any grandkids (as of this writing, he does not). Anzelmo continues to live and work in the northwestern suburbs of Chicago in Palatine and Arlington Heights.

Brian "Bowls" MacLean, Assistant Director:

Brian "Bowls" met Glasson and Greene while at Columbia College in Chicago. Both he and Glasson collaborated on several film projects during and after their college education, the last of which was THE FAMILY TIE. Bowls MacLean has since returned to St. Louis for video and film work.
